36.000 Scope of part.

This part prescribes policies and procedures peculiar to contracting for construction and architect-engineer services. It includes requirements for using certain clauses and standard forms that apply also to contracts for dismantling, demolition, or removal of improvements.

36.001 Definitions.

As used in this part—

Construction and demolition materials and debris means materials and debris generated during construction, renovation, demolition, or dismantling of all structures and buildings and associated infrastructure.

Diverting means redirecting materials that might otherwise be placed in the waste stream to recycling or recovery, excluding diversion to waste-to-energy facilities.

Subpart 36.1—General

36.101 Applicability.

(a) Construction and architect-engineer contracts are subject to the requirements in other parts of this regulation, which shall be followed when applicable.

(b) When a requirement in this part is inconsistent with a requirement in another part of this regulation, this part 36 shall take precedence if the acquisition of construction or architect-engineer services is involved.

(c) A contract for both construction and supplies or services shall include (1) clauses applicable to the predominant part of the work (see subpart 22.4), or (2) if the contract is divided into parts, the clauses applicable to each portion.

[48 FR 42356, Sept. 19, 1983, as amended at 57 FR 55471, Nov. 25, 1992; 58 FR 12140, Mar. 2, 1993]

36.102 Definitions.

As used in this part—

Contract is intended to refer to a contract for construction or a contract for architect-engineer services, unless another meaning is clearly intended.

Design means defining the construction requirement (including the functional relationships and technical systems to be used, such as architectural, environmental, structural, electrical, mechanical, and fire protection), producing the technical specifications and drawings, and preparing the construction cost estimate.

Design-bid-build means the traditional delivery method where design and construction are sequential and
